USDA ANNOUNCES FEDERAL FUNDING

(Tri-Community Water Supply Corporation to Receive \$869,000 Water and Waste Disposal Loan and Grant)

Fentress, Texas, October 9, 2002 — Bryan Daniel, state director, Texas USDA Rural Development announced today that Tri-Community Water Supply Corporation was awarded an \$869,000 loan and grant through the agency's Rural Utilities Service Water and Wastewater program. The effort is part of USDA's national program to help provide rural areas with safe, dependable water and modern sewage systems.

"One of the goals of USDA Rural Development is to provide water and wastewater treatment programs that target public health benefits and provide economic opportunities to America's rural communities," said Daniel. "Rural residents can utilize our programs to help provide essential public services that will enhance the quality of life for all rural residents."

The funds will be used to replace many of the galvanized steel pipes with PVC pipelines, and an elevated ground storage tank will be constructed. Population served by this project is 1,200.

The funds for this project comes as a result of the 2002 Farm Bill which provided \$360 million nationwide for water and wastewater projects in addition to Rural Development's 2002 funding of more than \$1 billion nationwide.

In Fiscal Year 2001, \$65.5 million of loan and grant assistance was infused into 29 rural Texas communities. USDA's water and wastewater program is designed to bring fresh, clean drinking water and sanitary, environmentally sound sewage facilities to rural America's 53 million residents. Loans and grants are available to rural communities of fewer than 10,000 residents. Public bodies, corporations operated on a nonprofit basis, and Indian tribes, that are unable to obtain credit from other sources at reasonable rates and terms, are eligible for assistance.
